PRODUCT

DIGITAL TWIN-based Robot Facility Control System

XR-based CAD Quality Inspection System

MIT's New System. Be Presented at CES 2024

"Digital Twin-based Robot Facility Control System" that reproduces all axial movements as digital twins and can control them regardless of location, and can simulate the desired motion by moving the robot freely

"XR-based CAD Quality Inspection System" that can be checked by matching product quality and work steps performed by XR-simulated quality inspection with actual CAD drawings to see if they meet the set standards
