### MIT Co., Ltd. PRODUCT

#### MIT XR Solution

##### MIT Viewer "XR-based Monitoring Solution"

Industrial sites can be reproduced as virtual models and facility data can be linked in real time through PLCs and sensors to monitor operating conditions, creating the advantage of improved productivity.

#### MIT XR Solution

##### MIT Safety "Safety Manage Solution"

Visualization of alarm information, such as the location of problems in the field and types of abnormalities, reduces the risk of safety accidents and increases management efficiency by improving response speed.

#### MIT XR Solution

##### MIT Manual "XR-based Education Solution"

By visualizing the delivery of facility operation menus with XR content, work and process changes are quickly provided to the site to support workers' on-site adaptability.

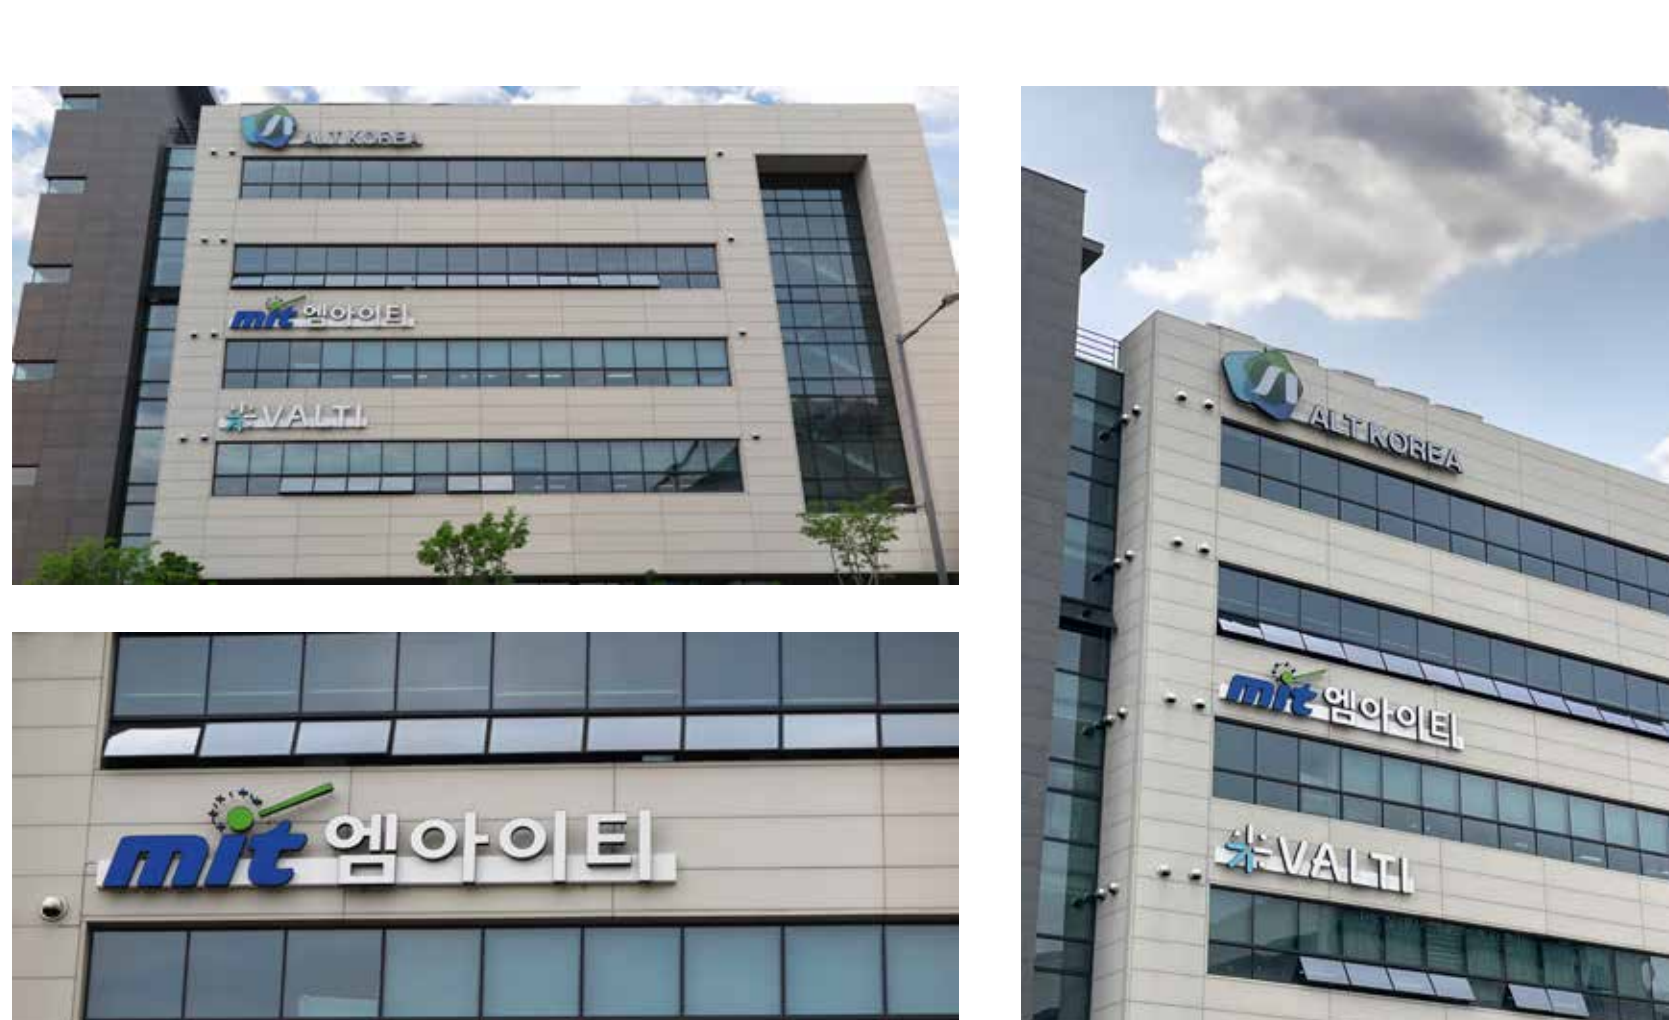

#### MIT XR Solution

##### MIT Assist "Real-time Remote Solution"

When a complex facility failure occurs and help from an external expert is needed, unnecessary business trips can be reduced by responding to the failure situation in real time through remote experts and smart devices.
